SOURCE

1. Two unconfirmed reports on uranium occurrences east and west of the HIRSCHBERG (O 51/G 68) Polish uranium mining center are forwarded.
2. The SCHMIEDBERG uranium occurrences have already been reported.
3. The so-called atomic energy research laboratory is probably the HIRSCHBERG laboratory where the crude ore produced is tested for uranium content.
4. According to press reports an institute for radium-uranium research was allegedly founded in WARSAW in 1947.
5. Reports on labor strength differ considerably. While one report cited 3,000 workmen for the end of 1947, only 400 workmen are mentioned in another report. Further information is required.
